IRCA ISO 27001:2005
Lead Auditor Course

Challange

Growing scrutiny toward industry's Information Security Management has made conformance with ISO 27001:2005- a voluntary, internationally recognized Information Security Management Systems (ISMS) standard - more important than ever. Competence of Lead auditors is the most important factor for ensuring effective implementation of the Information Security Management System. Information Security management system auditors require understanding of the standard, stake holder requirements, statutory requirements, skill of auditing, and finally the application of these in most complex situations.

Solution

Intertek Moody Training and Knowledge Solutions specialize in offering a variety of training solutions which enables both individuals and organizations to achieve key objectives. Our solutions help you to better understand, implement and enhance business management systems and assurance programs to drive consistent, transparent and accountable operations, improve risk management and deliver long-term, systematic and sustainable performance.

The courses designed by international specialists in the field of ISMS auditing involving the most modern accelerated learning techniques existing in the field of training. After successful completion of this course the delegates are competent to plan, conduct and report a Information Security Management System Audit.

Who Should Attend?

While no formal pre qualification is necessary to attend this course, those delegates with previous exposure to information security management system will have an added advantage.

As the training courses will be in English, competency in written and spoken English is a minimum requirement to understand this course. Course is best suited for top & middle management quality professionals like top management, management representatives, consultants, system implementers, HODs, internal & external auditors, etc.

ISO 27001:2005 Lead Auditor Course Details:

The Course is approved by IRCA (Course No. A17466). IRCA is regarded as the world leader in the approval of Training Organizations who present auditor training courses. IRCA evaluates, approves and maintains approval of around 100 Training Organisations annually, who between them present over 5,000 IRCA certified courses each year in all parts of the world. This course meets the training course requirements given by International Personnel Certification Association (IPC) and as such is recognized as meeting the Training Requirements for Auditor Registration.

Training Objective

To gain an in-depth and practical understanding of the ISO 27001:2005 audit requirements, with particular reference to audit management and consistent report writing.

Course Objective

This course is designed to:

- Explain the purpose of an Information Security Management System (ISMS) and explain the processes involved in establishing, implementing, operating and monitoring, reviewing and improving an ISMS as defined in ISO 27001, including the significance of these for ISMS auditors;
